

Axeon, Europe's leading electric vehicle battery supplier, is delighted to work in association with the Energy Saving Trust to provide you with an opportunity to find out more about battery technology and the benefits that this can bring through electric vehicles.

Electric Vehicles: an Overview for Fleet Managers

11 November 2009

Do you have responsibility for the management of fleet vehicles? You may have read about the increasing availability of electric vehicles, but are unsure how they operate and the implications for your fleet. This session seeks to demystify electric vehicles; you will learn from experts about electric vehicle batteries and how they work, what charging infrastructure you will require and how it can be installed and what funding support might be available. You will also hear the experiences of a fleet manager who uses EVs and will be offered the opportunity to test drive a range of electric vehicles (bookable in advance).

Venue

Stirling Management Centre, Stirling, Scotland
Coffee from 9.00; start at 9.30am

Speakers

Ian Murdoch, Energy Saving Trust
George Paterson, Axeon Power: Demystifying battery-powered vehicles
David Densley, Scottish & Southern Energy: Charging infrastructure
John Kilian, Glasgow City Council: A Fleet Manager's perspective
Paul Nelson, Allied Vehicles: Vehicle overview and finance options
Liz Gray, Future Transport Solutions: Added value of the transition to EV fleets

Cost

Delegate rate, including lunch and all technical materials: £75 + VAT
